

DATASET LICENSING / FREE SAMPLE

Sample Dataset Evaluation Licence

Free samples for internal business evaluation

This licence sets out how your organisation may access and evaluate DuckDuckGoose sample datasets. Please read it before requesting a sample pack.

DUCKDUCKGOOSE B.V. • VERSION 0.1 • 24 SEPTEMBER 2026

Sample Dataset Evaluation Licence

DuckDuckGoose B.V. | Version 0.1 | 24 September 2026

1 Parties and agreement

This Sample Dataset Evaluation Licence (Licence) is between DuckDuckGoose B.V., Netherlands (DDG, we, us), and the organisation identified in the sample request (Recipient, you). It is for business or professional use only. The individual accepting confirms that they are authorised to bind the Recipient and that the request details are accurate.

The agreement is formed when you actively accept this Licence and submit your sample request. The version presented at acceptance applies. DDG may decline a request before delivery. No fee, subscription or obligation to buy arises from the request or download.

2 Samples and permitted use

Samples means the free images, video clips, labels, metadata and accompanying documentation supplied by DDG for evaluation. Subject to this Licence, DDG grants you a non-exclusive, non-transferable, royalty-free licence for 90 days from your first successful download of the relevant sample pack (Evaluation Period). A further download of the same pack does not restart that period. DDG may extend it in writing.

You may inspect and internally evaluate the Samples for compatibility, quality and suitability, and test detection or verification systems you own or are authorised to evaluate, including third-party systems. Necessary working copies and preprocessing, such as resizing or format conversion, are permitted solely for that purpose. Copies and transformed versions remain subject to this Licence.

This Licence does not permit training, fine-tuning, distillation or other model fitting, inclusion in training datasets, production deployment or use in live decisions about real people. Broader rights require a separate written licence. Running an existing model on the Samples to measure its performance is permitted.

3 Access and external providers

Access is limited to staff and contractors who need it for the permitted evaluation. Contractors must be bound by confidentiality and use restrictions at least as protective as this Licence. Affiliates are not automatically licensed. You are responsible for authorised users and providers as for your own acts and omissions.

You may use private cloud infrastructure or submit Samples to an external detection or verification provider only where binding terms limit the provider to processing them for your evaluation, protect their confidentiality, prohibit the provider's own training, product improvement and onward distribution, and require deletion when no longer needed. Any subprocessors must be subject to equivalent restrictions. If these conditions cannot be met, obtain DDG's written approval first.

Do not upload Samples to public sharing sites, publicly accessible repositories, or AI services whose terms allow retention or reuse beyond this evaluation. Maintain reasonable access controls and security. Do not share personal download links or access tokens.

Sample Dataset Evaluation Licence

4 Restrictions and authorised testing

You must not sell, sublicense, publish, redistribute or make the Samples available outside the access allowed by section 3, including as part of another dataset, demonstration or service. Do not remove or falsify provenance information or rights notices, except for a necessary evaluation transformation where you preserve the original and its provenance separately.

You must not use the Samples for fraud, unlawful impersonation, opening real accounts, obtaining goods or services under a false identity, or testing systems without authorisation. Do not present them as genuine identity evidence. Authorised defensive testing is permitted only within an agreed test environment and scope, without misleading uninformed third parties or affecting real customers.

5 Rights and evaluation results

DDG will supply only Samples it is entitled to license for the permitted evaluation. Ownership is not transferred. Any intellectual property and database rights that subsist in the Samples, annotations, compilation or documentation remain with DDG or the relevant rights holders. No exclusive copyright in every AI-generated element is asserted by this Licence.

You retain rights in your own systems and evaluation findings. You may retain internal reports after the Evaluation Period if they contain no Sample files, embedded copies or extracts from which Samples can be reconstructed. This does not grant rights to publish or redistribute Samples. Neither party may imply the other's endorsement or use its name or logo in publicity without permission. Feedback is voluntary.

6 Provenance and personal data

Samples are supplied as AI-generated or manipulated evaluation material, not authentic identity evidence. Their provenance and any specific data characteristics are described in the accompanying documentation. The word synthetic does not, by itself, constitute a guarantee that material cannot relate to an identifiable person.

Do not try to identify real individuals from the Samples. If you reasonably suspect that a Sample exposes real personal data or infringes third-party rights, stop using the affected material, restrict access and notify DDG promptly using the contact below. DDG will investigate and, where appropriate, withdraw or replace it. This procedure does not limit either party's legal obligations.

Do not send DDG genuine identity documents or other personal data as feedback unless separately agreed. This Licence does not appoint either party to process personal data on the other's behalf. If the planned work requires such processing, the parties must put appropriate arrangements in place before it begins.

7 Delivery and sample limitations

Download links may be personal, time-limited or single-use, as stated when issued. Their expiry is separate from the Evaluation Period. DDG does not promise continued availability, support, updates, replacement samples or any future release under this free Licence.

Except for the express commitment in section 5 and rights that cannot lawfully be excluded, Samples are provided as is. DDG does not warrant that they are error-free, representative of every attack or population, suitable for a particular purpose, or sufficient for certification or compliance. Results on a small sample set do not establish overall detection performance. You remain responsible for evaluating suitability and interpreting results.

Sample Dataset Evaluation Licence

8 Liability

To the extent permitted by applicable law, DDG's total aggregate liability arising from or in connection with this Licence and all Samples provided under it, whether in contract, tort or otherwise, is limited to EUR 1,000. DDG is not liable for lost profit, lost revenue, lost business opportunities or indirect or consequential loss.

These exclusions and the cap do not apply to fraud, intentional misconduct or deliberate recklessness by DDG or its management, or to any liability that cannot lawfully be excluded or limited. Each party must take reasonable steps to mitigate loss. Nothing in this Licence transfers DDG's own statutory obligations to you.

9 Ending the evaluation

The right to use the Samples ends when the Evaluation Period expires or when this Licence is terminated. You may terminate at any time by stopping use and deleting the Samples. DDG may suspend access or use where reasonably necessary to address suspected serious misuse, security risks or third-party rights concerns, and will explain the reason where legally and practically possible.

DDG may terminate for a material breach not remedied within 10 days of written notice, or immediately if the breach cannot reasonably be remedied, involves fraud or intentional misuse, or continued use would be unlawful. On expiry or termination, stop use and delete the Samples and working copies, and require your authorised providers to do the same.

Copies in routine backups may remain until overwritten in the ordinary retention cycle, provided they are isolated and not restored for use. A copy required by law may be retained only for that legal purpose with restricted access. Confirm deletion on reasonable request. Sections 4 to 6, 8 and 11 survive as needed to give them effect; permitted internal reports may be retained under section 5.

10 Contact details and communications

DDG processes request details, licence acceptance records and relevant access or download records to handle requests, deliver Samples, secure access and administer this Licence. See its Privacy Policy at <https://www.duckduckgoose.ai/privacy-policy> for general information about how DDG handles personal data and your rights. This reference is not a request for blanket consent.

DDG may send communications needed to fulfil your request or administer this Licence. Promotional emails about datasets or new generation methods are optional, require a separate opt-in in this sample flow, and can be unsubscribed from at any time without affecting your evaluation rights.

11 General provisions

This Licence governs the free Samples only. A separately signed agreement that expressly covers the same Samples takes precedence to the extent of a conflict. No changes to an accepted Licence apply retrospectively without agreement. Any unenforceable provision will be limited or severed only to the extent necessary; the remainder continues to apply.

Dutch law governs this Licence. Subject to mandatory jurisdiction rules, disputes are subject to the exclusive jurisdiction of the competent court in The Hague, Netherlands. The parties will first seek a practical resolution through their designated contacts, without restricting urgent relief or applicable time limits.
